# **Boost Profits and Thrill Tenants with Comprehensive Property Management**

Manage cash and accrual accounting, assets, and maintenance with robust analytics.

Property developers need access to accurate, real-time information to minimize vacancies and streamline mundane business processes. Unfortunately, many property managers struggle with entry-level accounting systems or legacy applications that cannot connect with modern business systems.

Acumatica's native cloud construction software is a holistic Integrated Workplace Management System (IWMS) for commercial and mixed-use property managers providing:

- Robust financials with cash and accrual property accounting, general ledger, accounts payable, bank feeds, accounts receivable with collections, project accounting, cash management, multicurrency, payroll, and deferred and recurring revenue.
- **Flexible property management** with lease management and financial reporting by company and property.
- **Mobile asset management** with fixed asset depreciation and mobile field service with dispatch and scheduling.
- Automation includes AP bill processing and Advanced Expense Management powered by artificial intelligence with machine learning, a configurable Visual Workflow Engine for approvals, and tailored business events for notifications.

"Using the software has made our reporting ten times better from what we had before. For us, our next big step is being a landlord. If you know anything about being a landlord, you have a lot of variables."

#### **Property Accounting**

Acumatica Financial Management supports cash or accrual property accounting. Automate accounts payable with vendor invoice recognition powered by artificial intelligence, automate collection letters, prioritize collection activities, and depreciate assets with fixed asset accounting. Other accounting features include automated bank feeds, multi-company support, multicurrency, intercompany accounting, cash management, payroll, and recurring and deferred revenue.

## **Property Management**

Organize properties using companies and branches for financial transactions and analysis. Generate consolidated financials and manage property details, including property type, dates, fees, maintenance schedules, hours of operation, addresses and lot details, expenses, lease administration details, and more.

#### **Lease Management**

Create, manage, and renew leases with flexible terms, start and end dates, rent charges, renewal status, contacts, security deposits, late fees, utility details, lease history, insurance requirements, and other information. Use square footage to allocate property costs to tenant leases.

#### **Facility Maintenance**

Create maintenance work orders for field technicians or leverage the native field service application for advanced service dispatch, scheduling, and reporting.

### **Commercial Properties**

Commercial property managers automate escalations and recoveries, manage leases and abstracts, track lease options and dates, manage utility billing, automate tenant reminders, and calculate and bill outgoings. Acumatica supports office, industrial and warehouse, retail, real estate, corporate buildings, parks and recreation, co-working spaces, and other commercial property businesses.

#### **Construction Projects**

Manage new building construction or facility improvement projects such as remodeling or buildouts with construction projects. Manage projects, costs, and company-wide capacity linked with opportunities, contracts, schedules, budgets, change orders, and subcontracts. Manage subcontractors and materials using purchase orders, inventory control, and advanced warehousing management. Gain job cost insight, including cost-to-complete, cost at completion, and percentage of completion.

### **Tenant Relationships**

Gain a 360-degree view of tenant and prospect activities, including opportunities, appointments, tasks, agreements, payments, maintenance orders, and service calls. Acumatica CRM empowers tenants with a self-service portal to view bills, statements, and documents online.

# **Business Intelligence**

Configure actionable dashboards to manage receivables, payables, work orders, leases, and tenants with drilldowns to detailed transactions. Easily create custom inquiries without coding and tailor reports without programming experience. Harness Microsoft Power BI for deeper insights and key performance indicators.

#### Mobility

Cloud-native design and iOS and Android mobile apps empower users to work from anywhere on any device. Capture expense receipts, time entries, and electronic signatures on-the-go and access every screen, report, and dashboard anywhere you have an internet connection.
